Project Milestone 1

"Team Members, Team E-mail addresses, and Team Name"

For this project milestone, you'll be finding groups for your class project. Each group should be composed of 3-5 people.

Although you don't have to commit to any specific project ideas at this time, when pairing off, some good things to consider are:

*Do you have similar visions for the "type" of application you are hoping to develop?

*Do you have complementary skillsets/areas of expertise that could synergize with each other?

*Do you know the other people? Are you confident you can get along with them and work well together?

*Do your course schedules allow you to find times to actually work with each other face-to-face?

Once you've settled on your group, please make a pdf document that contains the following information:

1.) The names of the members of your group.
2.) The preferred e-mail addresses of those members.
3.) A name for your team.

Once that document has been created, please elect one member of your team to submit it via Moodle.
